Forecast for Wednesday 31 May 2023

Weather: Cloud returning from the east during the early hours, perhaps more extensive than it was on Tuesday. The odd spot of drizzle cannot be completely ruled out. Cloud will be somewhat slower to lift and break than on the previous day, however warm sunny spells are expected to develop by mid-afternoon, especially in the west. Some late sunny spells before cloud thickens again later in the evening. Breezy with gusty winds through the morning.

Chance of cloud-free hill tops above 600m: 20% in east 50% in west, becoming 90% for all by early afternoon.

Low cloud and visibility: Extensive cloud obscuring routes above 400m, before cloud lifts to 600m by mid-morning and then breaks early afternoon. Visibility poor in low cloud, becoming very good once dissipated although distant hills appearing rather hazy

Meteorologist's View

Despite the cloud, UV Levels are expected to be high or very high, especially in any sunnier breaks, therefore adequate sun protection is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 01 Jun 2023

Weather: Low cloud soon returning from the east during the early hours, with perhaps clearer skies further west of the park. Cloud gradually breaking and lifting through the morning to leave a fine day with plenty of prolonged warm sunshine. Remaining dry with clear skies into the late evening. Very high UV levels.

Maximum wind: Northeasterly 15 mph gusting 25 mph.

Chance of cloud-free hill tops above 600m: 30% in the east first thing, becoming greater than 90% by mid-morning.

Low cloud and visibility: Low cloud, mainly on eastern slopes first thing with bases around 400 m, soon lifting and breaking to above the summits by mid-morning. Poor visibility initially in lower cloud, though soon rising to very good.

Temperature: **Valleys:** Plus 10 Celsius rising to Plus 19 Celsius.
At 600m: Plus 5 rising Celsius to Plus 14 Celsius.
Freezing level: Above summits.
